Challenge Puzzle for Design Internship:

Create 3-5 banners, sized 1200x450, for our client's apps and websites that represent a different category of alcohol, displayed in a seasonal way. Each banner would in theory be applied to over 1,000 retailers so no logos or retailers specific details. For example, in the summer months, we highlighted a couple of best selling tequila brands, in an island setting. For more examples check this [website](#).
