

Challenge Puzzle

Quiz 1:

You have 14 balls. One of them is either heavier or lighter than the rest, and the remaining 13 are identical in weight.

You need to find out:

1. Which ball is the odd one?
2. Whether it is heavier or lighter, using the fewest number of weighings on a balance scale.

Quiz 2:

How Laiye, a regional leader in RPA and intelligent automation, can defeat UiPath in the longer run?

Quiz 3:

Give an example of AI agent use case that will create tremendous values for a significant large enough niche market.
